# My Practice

MOBILE and MONITOR

- Track every shot hit with each club
- Understand tendencies and bad habits
- Dispersion rates in “My Stats”
- Track Progress overtime

# Driving & Approach Challenge

MONITOR ONLY

- Practice real life scenarios on the golf course
- Each shot within the challenge will require club selection, aim, and course management
- Each shot is worth points to track progress overtime

# Precision & Precision Series

## MOBILE ONLY

- Narrow in on a particular target or hit shots to a series of targets
- Aim at the targets on your range and receive points based on proximity to the target
- Precision series will allow you to switch clubs and hit from different distances
- Practice real life shots, changing clubs, and pre shot routine

# Instruction Examples

## 1. Nike Jr. Golf Camps

- First day of camp every player completed T30 assignment
- Based on the results, the instructor assigned them a specific game mode
- All players navigated their way through different games to improve their weaknesses
- Last day of camp they completed T30 again to track progress

## 2. Adding “My Practice” to Clinics

- To start every clinic, each player will choose 2 clubs to warm up with
- As they hit these clubs to warm up they utilize My Practice game mode
- After a 5-day clinic, each player has data on distances and dispersions for 10 of their clubs

## 3. Utilizing “Warm Up”

- Increase the knowledge of your student by having their Warm Up game mode open during the lesson
- Understanding what their ball speed, apex, and carry numbers when “it clicks” helps their self discovery when practicing on their own
